SUMMARY

Software Engineer with experience designing and building scalable cloud-native applications using C#, ASP.NET Core, React, and Angular. Strong background in microservices architecture, RESTful API development, and event-driven systems using Kafka. Experienced in deploying containerized applications using Docker and Kubernetes on Azure cloud environments. Proven ability to build secure, high-performance, and distributed enterprise systems with a focus on scalability, reliability, and production support.

EXPERIENCE

California State University San Bernardino, CA

Full Stack Web Developer Jan 2023 – Dec 2024

- Designed and developed scalable full-stack web applications using React and JavaScript with RESTful API-based backend integration.
- Built reusable and modular UI components using component-based architecture, improving maintainability and reducing code duplication.
- Integrated frontend applications with backend services to ensure efficient data flow, consistent API communication, and improved user experience.
- Optimized application performance by improving API call efficiency, reducing unnecessary re-renders, and enhancing front-end responsiveness.
- Implemented debugging and testing strategies to identify UI and API issues early, improving overall application stability and reliability.
- Collaborated with stakeholders and cross-functional teams to translate business requirements into production-ready software features.
- Participated in Agile development process including sprint planning, daily stand-ups, and iterative feature delivery.

Accenture Solutions Pvt Ltd Hyderabad, India

Application Development Associate Aug 2021 – Feb 2023

- Designed, developed, and maintained enterprise backend applications using C# and RESTful APIs in a distributed system environment.
- Worked on microservices-based architecture to build scalable, loosely coupled services supporting business-critical applications.
- Developed and enhanced backend service logic, ensuring high performance, maintainability, and secure data handling.
- Participated in full SDLC including requirement analysis, system design, development, testing, deployment support, and production maintenance.
- Contributed to CI/CD pipelines using Git-based workflows to enable automated builds, testing, and smooth deployments.
- Performed code reviews and ensured adherence to coding standards, security guidelines, and best practices (including OWASP principles).
- Provided production support by troubleshooting live system issues, performing root cause analysis, and implementing permanent fixes.
- Identified performance bottlenecks in backend services and improved system reliability through optimization and refactoring.

DXC Technology Hyderabad, India

Python Developer Intern Jun 2020 – Jul 2021

- Developed Python-based automation scripts to streamline backend workflows and reduce manual processing effort.
- Built and tested RESTful API integrations to support internal enterprise systems and data exchange processes.
- Automated repetitive business operations, improving operational efficiency and reducing processing time.
- Assisted in debugging and maintaining legacy backend systems to improve system stability and reduce failures.
- Worked closely with senior engineers to understand system design principles and software engineering best practices.

TECHNICAL SKILLS

Programming Languages: C#, Python, JavaScript, TypeScript, SQL

Backend: ASP.NET Core, REST APIs, Microservices, GraphQL, Event-Driven Architecture, Kafka

Frontend: React, Angular, Blazor, HTML5, CSS3

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, Terraform, GitHub Actions, Azure DevOps, Helm, ArgoCD

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, NoSQL

Practices: TDD, BDD, Agile/Scrum, CI/CD, OWASP Security, Unit Testing, Integration Testing

Architecture: Distributed Systems, Cloud-Native Architecture, Vertical Slice Architecture, Scalable Systems

Tools: Git, Jira, Confluence, Monitoring & Logging Tools

PROJECTS

Food Ordering Website

Jun 2023 – Dec 2023

- Developed a scalable and responsive food ordering platform with a clean, modern user interface across desktop and mobile devices.
- Built reusable UI components and maintained a performance-focused architecture for long-term scalability and maintainability.

Ecommerce Web Application

Jan 2023 – May 2023

- Built a modern ecommerce web application with mobile-first responsiveness and accessibility-focused design.
- Reduced resource consumption by 25% through code splitting, caching strategies, and front-end optimization techniques.

House Price Prediction System

Sep 2023 – Dec 2023

- Developed a machine learning model using Python and Scikit-learn to predict house prices based on structured real-estate features.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy and overall model reliability.

EDUCATION

California State University, San Bernardino <i>M.S. in Computer Science</i> Relevant Coursework: Software Engineering, Operating Systems, Algorithms, Data Structures	Dec 2024 <i>GPA: 3.7</i>
Malla Reddy Engineering College for Women, India <i>Bachelor's Degree</i> Relevant Coursework: Python, Java, OOP, JavaScript, Operating Systems, HTML, CSS	Jul 2017 <i>GPA: 3.5</i>
